

MATH PROJECT AT SAC STATE

FOCUS ON STUDENT THINKING: ENGAGE & REFLECT (FOSTER)

This is a new series for **K-12 teachers** where we can **reflect on what learning was like last year**. With a focus on student thinking we will ask ourselves — “What is worth keeping?”

As we reflect we will also **deepen your understanding of mathematics** and **engage with peers to unpack the teaching of mathematics**. Each session will be unique!

Here are some topics we will be covering:

- Experience inclusion activities & build community
- Problem solving, engaging in discourse, and question-posing
- Open exploration and identify questions to extend thinking
- Explore different technology & tools
